

- C. Casing: 30" at 431 feet  
13 3/8" at 1207 feet  
9 5/8" at 4282 feet

- D. Mud program: Initial drilling from the sea floor to 1250 feet was with sea water and gel without casing. Returns were to the sea floor.

Below 1250 feet to a depth of 7055 feet, a Spersene XP-20 Ligno-sulphonate mud with 3 to 8% diesel oil was used. From 7055 feet to 9122 feet, the mud system contained salt saturated Spersene XP-20 Lignosulphonate mud with 5 to 9% diesel oil.
