nodular concretions of calcite with irregular						
poorly sorted						
vein in limestone						
gypsum precipitate						
woody laminations						
woody layers surrounded						
partly nodular cement						
slightly micaceous						
carbonaceous layers						
spherulomorphs						
oil stain						
scour						
granules						
woody and granular						
lamination						
small channel						
granular layer						
syneresis cracks+veins						
oil stain						
partly calcite cement						
decreasing granules						
coarse lamination						
granules decreasing,						
granular layer						
increasing granules						
coarse granules						
oil stain-very friable
