

NPD – exploration drilling result

04/11/2002 Press Release No. 38/2002: Statoil ASA, operator of Tyrihans Sør on Haltenbanken, has proven hydrocarbons in appraisal well 6406/3-6.

The well is being drilled in production license 091. The structure also extends into production license 073, and the drilling costs are covered by both production licenses.

The discovery represents additional reserves for the previously proven hydrocarbons on Tyrihans Sør, and preliminary analyses indicate both oil and gas.

The well is being drilled with the Stena Don drilling rig at a water depth of 273 meters.

See [Factpages](#) for more information about this wellbore.
