

NPD – exploration drilling result

15/01/2007 The Norwegian Petroleum Directorate (NPD) has granted Eni a drilling permit for wellbore 6607/2-1 in production licence 329 in the Norwegian Sea.

Wellbore 6607/2-1 will be drilled from the *Transocean Leader* drilling facility at the following position coordinates: 66° 49' 20,18" North and 7° 22' 15,50" East.

The drilling programme for wellbore 6607/2-1 applies to drilling of a wildcat well in a production licence. The licencees are: Eni 40 %, Petoro 20 %. Dong 20 % and Gaz de France 20 %.

The area in this production licence encompasses the following blocks 6607/1, 6607/2 and 6607/4 in the northern part of the Northern Sea southeast of the gas discovery 6707/10-1.

The production licence was awarded in the 18. licensing round in 2004.

Well 6607/2-1 is the first wildcat well in this production licence.

The drilling permit is conditional upon the operator obtaining all other permits and consents required by other authorities before the drilling activity commences.

See [Factpages](#) for more information about this wellbore.

6607/2-1

23/03/2007 Press release 13/2007:Eni Norge has, as operator of production licence 329, concluded drilling of wildcat well 6607/2-1 in the Norwegian Sea in waters of 860 metres TVD.

The well was dry.

The objective of the well was to explore the potential in a Paleocene prospect located about 30 km south-east of the discovery 6707/10-1 Luva and about 80 kilometres NNW of the Norne field.

Wildcat well 6607/2-1 was drilled to a total depth of 3503 metres TVD below the sea surface. The well was concluded in the Springar formation in rocks of Upper Cretaceous age.

Well 6607/2-1 was drilled using the semi-submersible drilling facility *Transocean Leader*. The facility will now move to PL 324 in the Norwegian Sea for drilling of well 6504/5-1 S.

Licensees in production licence 329:

Eni Norge AS (operator)	40%
Gaz de France Norge AS	20%
DONG E&P Norge AS	20%
Petoro AS	20%
