

NPD – exploration drilling result

20/05/2014 The Norwegian Petroleum Directorate has granted Centrica Energi (Norge) AS a drilling permit for wellbore 8/10-6 S.

Wellbore 8/10-6 S will be drilled from the *Mærsk Giant* drilling facility at position 57°3'09.92"N and 3°3'42.12"E.

The drilling program for wellbore 8/10-6 S relates to drilling of a wildcat well in production licence 405. Centrica Energi (Norge) AS is the operator with an ownership interest of 40 per cent. The licensees are Suncor Energy Norge AS with 30 per cent, Faroe Petroleum Norge AS with 15 per cent and Tullow Oil Norge AS with 15 per cent ownership interests. Production licence 405 was awarded in APA 2006.

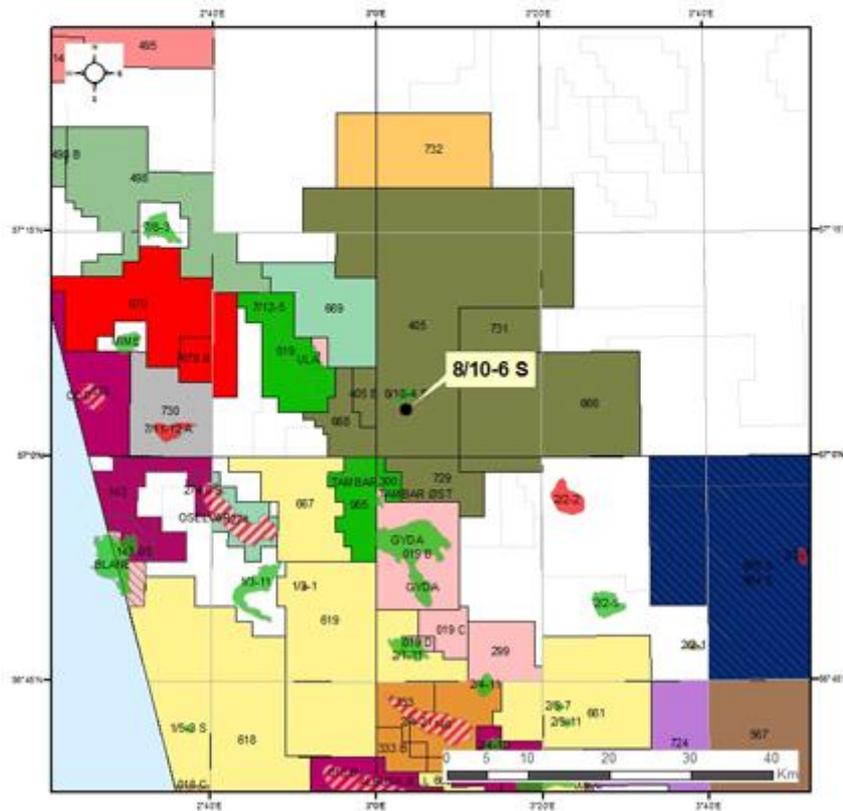

The area in this production licence is located in the southern part of the North Sea and consists of parts of blocks 7/9, 7/12, 8/7, 8/8, 8/10 and 8/11. Wellbore 8/10-6 S is the sixth exploration well in this production licence.

The drilling permit is contingent upon the operator securing all other permits and consents required by other authorities prior to commencing drilling activities.

See [Factpages](#) for more information about this wellbore.

8/10-6 S

23/07/2014 Centrica Resources Norge AS, operator of production licence 405, has completed drilling of wildcat well 8/10-6 S. The well is dry.

The well was drilled 13 kilometres southeast of the Ula field in the southeastern part of the North Sea.

The objective of the well was to prove petroleum in Upper Jurassic reservoir rocks (Ula formation) in a new segment southwest of the 8/10-4 S oil discovery proven in 2011.

The well encountered 55 metres of sandstone in the Ula formation with good reservoir quality, but hydrocarbons were not proven. Data acquisition and sampling have been carried out.

The well is the seventh exploration well in [production licence 405](#). The licence was awarded in APA 2006.

The well was drilled to a vertical depth of 1945 metres below the sea surface and was terminated in the Zechstein group in the Permian. Water depth is 66 metres. The well is now permanently plugged and abandoned.

Well 8/10-6 S was drilled by the *Mærsk Giant* drilling facility, which will now proceed to production licence 494 in the southern North Sea to drill wildcat well 2/9-5 S where Det norske oljeselskap ASA is the operator.
