

NPD – exploration drilling result

20/06/2019 The Norwegian Petroleum Directorate has granted Aker BP ASA a drilling permit for well 6608/6-1 cf. Section 15 of the Resource Management Regulations.

Well 6608/6-1 will be drilled from the Deepsea Stavanger drilling facility in position 66 30`2.69 N and 08 56`19.27 E.

The drilling programme for well 6608/6-1 relates to the drilling of a wildcat well in production licence 762. Aker BP ASA is the operator with an ownership interest of 20 per cent.

The other licensees are Equinor Energy AS with 60 per cent and Petoro AS with 20 per cent. The area in this licence consists of parts of blocks 6608/6, 6608/9, 6609/4 and 6609/7. The well will be drilled about 60 kilometres northeast of the Norne field.

Production licence 762 was awarded on 7 February 2014 in APA 2013. This is the first exploration well to be drilled in the licence.

The permit is contingent on the operator securing all other permits and consents required by other authorities prior to commencing the drilling activity.

See [Factpages](#) for more information about this wellbore.

Dry well northeast of the Norne field in the Norwegian Sea – 6608/6-1

20/08/2019 Aker BP ASA, operator of production licence 762, has concluded the drilling of wildcat well 6608/6-1.

The well was drilled about 65 kilometres northeast of the Norne field and 170 kilometres west of Sandnessjøen.

The objective of the well was to prove petroleum in reservoir rocks from the Permian Age.

Well 6608/6-1 encountered about 285 metres of carbonate rocks in the Zechstein group in the Permian. These are partially tight and partially with poor reservoir quality, but with four metres of moderate reservoir quality.

The well is dry. Extensive volumes of data have been collected.

This is the first exploration well in [production licence 762](#), which was awarded in APA 2013.

Well 6608/6-1 was drilled to a vertical depth of 2724 metres below the sea surface, and was terminated in the Zechstein Group from the Permian Age. Water depth at the site is 288 metres. The well has now been permanently plugged and abandoned.

Well 6608/6-1 was drilled by the Deepsea Stavanger drilling facility, which has now started drilling of wildcat well 30/12-2 in [production licence 986](#) in the North Sea, where Aker BP ASA is the operator.
