Description

Text	Date updated
34/6-2 S (Garantiana) is a discovery in the northern North Sea, 15 kilometres north of the Visund field. The water depth is 380 metres. The discovery was proven in 2012 and delineated in 2014. The reservoir contains oil in sandstone of Early Jurassic age in the Cook Formation. In 2021, a new discovery was made in a separate structure just west of Garantiana, while another separate structure south of Garantiana proved to be dry in 2023.	19.12.2023
