Description

Type	Text	Date updated
Development	Norne is a field in the Norwegian Sea, 80 kilometres north of the Heidrun field. The water depth is 380 metres. Norne was discovered in 1992, and the plan for development and operation (PDO) was approved in 1995. The field has been developed with a production, storage and offloading vessel (FPSO), connected to seven subsea templates. The production started in 1997. An amended PDO for several deposits in the area around the Norne and Urd fields was approved in 2008. The Alve, Urd, Skuld and Marulk fields are tied-back to the Norne FPSO.	14.12.2023
Reservoir	Norne produces oil and gas from Jurassic sandstone. Oil is mainly found in the Ile and Tofte Formations, and gas in the Not Formation. The reservoir is at a depth of 2500 metres and has good quality.	14.12.2023
Recovery strategy	The field is produced by water injection as the drive mechanism. Gas injection ceased in 2005 and all gas is exported.	28.02.2023

Transport	The oil is loaded to tankers for export. Gas export started in 2001 through a dedicated pipeline to the Åsgard field and via Åsgard Transport System (ÅTS) to the Kårstø terminal.	28.02.2023
Status	The production from Norne is in the decline phase. Production challenges are related to reservoir souring, increasing water cut, scale and well integrity due to aging facilities. The key activities include identifying new well targets and optimising the water injection strategy. Tie-back of the Verdande field and the discovery 6507/3-8 Andvare to the Norne FPSO are being prepared.	14.12.2023

Investments (expected)

The operators future investments related to the reservers from 2023 [mill NOK 2023-kroner]. The stated investment estimate has not been corrected for possible investment sharing.	1353

Production - charts

Net - oil [mill Sm3]

Net - gas [bill Sm3]

Net - condensate [mill Sm3]

Net - NGL [mill Sm3]

Produced water in field [mill Sm3]

Any produced water is only included after 1.1.2000

Wellbores - exploration

Wellbore name	Entered date	Completed date	Purpose	Status	Content
