|-----------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|
| Utbygging | Mime ligger i den sørlige delen av norsk sektor i Nordsjøen, seks kilometer nordøst for Cod. Vanndybden er 80 meter. Mime ble påvist i 1982, og plan for utbygging og drift (PUD) ble godkjent i 1992. Feltet ble bygget ut med en undervannsbrønn knyttet til Cod-innretningen. Produksjonen startet tidlig i 1993. | 28.02.2023     |
| Reservoar | Mime produserte olje fra sandstein av senjura alder i Ulaformasjonen. Reservoaret ligger på om lag 4200 meters dyp.                                                                                                                                                                                                  | 28.02.2023     |
| Utvinning | Feltet ble produsert med trykkavlastning.                                                                                                                                                                                                                                                                            | 28.02.2023     |
| Transport | Brønnstrømmen fra Mime ble blandet med gass og kondensat fra Cod og transportert til Ekofisk-senteret. Oljen ble transportert videre til Teesside i Storbritannia, mens gassen ble benyttet på Ekofisk-senteret.                                                                                                     | 28.02.2023     |
| Status    | Mime ble stengt ned 1993, og innretningen ble fjernet i 1999.                                                                                                                                                                                                                                                        | 09.12.2023     |
