

Generell informasjon

Litostrat. enhet	RED BEDS (INFORMAL)
NPDID for litostrat. enhet	129
Nivå	GROUP

Nivå under

Litostrat. enhet

Beskrivelse

Red beds (informal)

Sediments of Triassic age beneath the Åre Formation have been encountered in a number of wells offshore mid-Norway. Based on their colour the Triassic section in the Norwegian Sea has been informally divided into [“Grey Beds”](#) and “Red Beds”. The “Red Beds” sediments represent continental clastics of red colour deposited in a more arid climate compared to the [“Grey Beds”](#) sediments. Thicknesses of more than 2500 meters have been drilled. No type well section has been established.
