General

Well 6507/3-13 A was planned as a geological appraisal side-track to 6507/3-13 on the Dønna Terrace in the Norwegian Sea. The objective of the side-track was to test the Snadd Outer Outer prospect (Lysing) Formation and to prove additional volume potential down-flank in Black Vulture (Lange Formation)

Operations and results

Appraisal well 6507/3-13 A was never kicked off due to major losses when pulling the 9 5/8".

The objectives of the well were not fulfilled

No cores were cut. No fluid sample was taken.

The well was permanently abandoned on 7 June 2019 as a junk well.

Testing

No drill stem test was performed.

Cuttings at the Norwegian Offshore Directorate

Cutting sample, top depth [m]	Cutting samples, bottom depth [m]
1310.00	1390.00
